VENDOR SEMINAR:

QualiT™ - a New Quality Control Toolbox for Mycotoxin and Allergen Analysis

QualiT™ - a new quality control toolbox for mycotoxin and allergen analysis

Christine M. Gutschelhofer & Ronald Niemeijer, R-Biopharm AG, Germany

QualiT™ is a toolbox developed by Trilogly Analytical Laboratory (Washington, MO, USA) for quality control in mycotoxin analysis and - now introducing - also allergen analysis. QualiT™ offers (certified) reference materials, both as pure material and as well as naturally contaminated materials, quality control materials and analytical standards. Besides that Trilogly offers additional useful tools for sample preparation and sample clean-up and knowledge database, collecting 20 years of experience as an (ISO 17025 accredited) food testing lab, specialized in mycotoxin, allergen and biogenic amines testing.
